| Note: Magnecor sets for BMW's can be fitted through the one or two part rectangular cable retainers if ordered in 7mm cable. We can fit cables into the one piece cable retainers at extra cost but we suggest that the cables are not fitted into this tube, as they are a major cause of cable failure. |                |                       |                  |           |                    |              |              |                               |

## FORD

PLEASE NOTE: AS EARLY AS 1996 FORD INTRODUCED A SECOND GENERATION TYPE IGNITION COIL/PACK ON THE ZETEC 'E' & 'S' ENGINES, THAT REQUIRED A DIFFERENT BOOT/TERMINAL COMBINATION. AS IT IS DIFFICULT TO ASCERTAIN WHICH COIL PACK AND SPARK PLUG BOOT TYPE IS FITTED TO THE VEHICLES AT THE MODEL CHANGE-OVERS (ie Build Dates), WE HAVE PROVIDED A PICTORIAL PAGE TO HELP YOU VERIFY WHICH SET TO ORDER FOR YOUR VEHICLE. PLEASE REFER TO PAGE 3 AND CHECK THE VEHICLE BEFORE ORDERING. THANK YOU.

### 4 cylinder

| Please question your customers about the terminal fittings used on their vehicle. (i.e. conv./post/pin). Some vehicles have conventional fit distributor cap and pin type coils etc. Another common problem is the vehicle has been fitted with the incorrect distributor cap at some stage during a service or repair i.e. it has a conventional fit type, where it should have a pin fit type. This obviously causes a lot of problems as a lead set is also fitted at the same time to match the incorrect distributor cap. |                |                       |                  |           |                    |              |              |            |          |                  |
| Engine codes and application notes are the only method we use to recognise the correct lead set for your car - please use them.                                                                                                                                                                                                                                                                                                                                                                                                |                |                       |                  |           |                    |              |              |            |          |                  |
